

ENC-616 & ENC-816

Enclosure for 6-1/2" & 8" Subwoofers & Speakers

DESCRIPTION

Our new In-Ceiling Acoustic Enclosures embody the epitome of "Made in USA." We developed an efficient CNC technique to prove that we could manufacture our in-ceiling enclosures stateside for a portion of the cost of manufacturing in China... and we succeeded quite nicely. These beautiful boxes are constructed from 1/2" MDF and provide superb acoustic isolation between rooms and consistent acoustic tuning for all of our speakers and subwoofers. The 16 litre sealed enclosures also helps to increase low-frequency power handling and bass response. Each enclosure comes pre-installed with shredded denim acoustic damping material and a cord-grip connector that produces an airtight seal and prevents accidental pull out of your speaker wires. We now also provide a Raw version without accessories and Paint. Typically builders utilize the Raw version without Accessories and paint as they are more cost effective. Each enclosure fits between 2x10 joists at 12" on-center.

FEATURES

- Sized to fit easily into 12" O.C. joists
- Durable construction with heavily glued seams and joints
- Raw version comes with shredded denim batting, foam strips and cord-grip connector
- Painted version also comes with cutout template and black gloss textured finish

SPECIFICATIONS

16-Liter design (.56 cu. ft.) perfect for 8" woofers as well as 6.5" 15° angled loudspeakers

Ships with shredded denim batting, cordstrip connector and foam strips

Longer brackets available for mounting between wider joist dimensions (**ENC-LB**)

DIMENSIONS

Overall Dimensions:
13" x 10.5" x 8.75" D
